

Another Reason to be Cautious About Signing a Union Card...

You should be aware that if the union gets a minimum of 30% of employees to sign authorization cards and an election is scheduled by the National Labor Relations Board,

WWL - Vehicle Services Americas would then be required by law to provide the union with all of your personal information – whether you want the union to have it or not.

WWL - Vehicle Services Americas would have no choice at that point. If we have to give your information to the union, expect to see many more union visits at home as they push employees to support them.

*If we have it on file

A teal padlock icon with a teal arrow pointing to the right, indicating that the information in the file is being shared or locked away.

Do you really want the union to have your personal information to use as they want?
