

No Health Care Increases for Third Year in a Row

During ongoing open enrollment, we wanted to share that we have made the decision once again to absorb the rising costs of health care for our WWL – Vehicle Services Americas employees.

With the costs of everything continuing to go up, we hope this provides some relief to you and your families.

We also still pay 87 percent of your health care coverage, which means you only have to pay 13 percent.

Ask your leader or Human Resources if you have questions about health care or open enrollment.
