

→ YOU SP^{🗣️}KE UP, WE'RE LIST[👂]ENING

Can We Fix It, Yes We VAN!

You've been telling us we needed to up our game when it comes to transportation vehicles.

Just like you, we try to get the most life out of our equipment and make it last, but when we hear from you, we want to try to make meaningful improvements for all of us.

You might have noticed:

- We fixed many of the complaints about the transportation vans like them creating toxic fumes (let us know if it becomes a problem again)
- Two new electric vans have been added to the fleet, which should help with fumes, interior climate, and conserve some energy

These improvements should make things better for many of us at WWL – Vehicle Services Americas.

**Thank you for bringing these things to our attention.
Keep sharing your thoughts!**
